- Stress Relieving
- Blanchard Grinding
- Saw Cutting
- Punching
- Blasting
- Shearing – Press
- Bending - Press Brake
- Rolling
- Deburring
- Flattening
- Welding Fabrication
- Machining
- Plate Beveling

Over 100 Years of Steel Service Experience

TMT started in January 1986 with 12 employees, while today TMT has 25 employees. We started out of an 8,000 square foot building located on Symmes Road in Hamilton, Ohio. Our marketing niche was plate burnouts using an electronic eye to trace parts and shearing blanks to size. With one truck we serviced the greater Cincinnati area and expanded in our second year with two trucks into Indiana, Kentucky and West Virginia.

TMT bought a 1350 watt Cincinnati laser and a 175 ton press brake to expand our services. Currently TMT has four lasers: a 1350 watt, a 2000 watt and two 2500 watts. These lasers give us the capabilities to cut 5/8" carbon, 3/8" stainless, 1/4" aluminum and plastic.

Our oxy fuel machines have CNC capabilities and we purchased two ESAB 600 amp plasma/oxy fuel Avenger machines. These machines give TMT the ability to cut 1-1/4" thick using plasma and 12" thick carbon with oxy fuel and in addition we can cut 2" thick stainless and 3" thick aluminum.

Our goal for the future is to continue to expand and assist our customers reach their ever increasing needs.
